

# MICROSOFT CERTIFIED DATABASE ADMINISTRATOR (MCDBA)

## Objectives:

The Microsoft Certified Database Administrator (MCDBA) credential is the premier certification for professionals who implement and administer MS SQL Server databases. This certificate is appropriate for individuals who derive physical database designs, develop logical data models, create physical databases, create data services by using Transact-SQL, manage and maintain databases, configure and manage security, monitor and optimize databases, and install and configure MS SQL Server.

With the rapid change of technology in today's competitive world, the most skilled and proven information technology (IT) professionals are high in demand. There is an abundance of opportunities in the IT field, and the time has never been better to prove your expertise to employers, colleagues and clients with the professional credentials meant to set you apart.

The MCDBA certification demonstrates that you have the necessary skills to lead organisations in the successful design, implementation, and administration of Microsoft SQL Server databases.

Training and job experience are vital components to passing exams and earning your MCDBA certification. Microsoft Official Curriculum (MOC) offers the right solution. Or instructor-led training courses, delivered through our premier partner channel, are based on job-related tasks to give your hands-on real world knowledge and skills.

## Course Overview:

MCDBA – Windows 2003 Track (4 Exams required)

TEST #	CORE SQL SERVER ADMINISTRATION & DESIGN EXAMS	COURSE #
70-228	Installing, Configuring and Administering Microsoft SQL Server 2000	<a href="#">2072</a>
70-229	Designing and Implementing Databases with MS SQL Server 2000 Enterprise Edition	<a href="#">2073</a>
