

# MICROSOFT CERTIFIED PROFESSIONAL (MCP)

## **Objectives:**

The Microsoft Certified Professional (MCP) certification is appropriate for IT professionals and developers seeking career enhancement and recognition of their skills and in-depth knowledge of at least one Microsoft product or technology.

Microsoft certifications reflect specific skill sets and actual job tasks found in the real world. IT Managers seeking computer professionals can be assured that individuals who are Microsoft-certified are prepared to meet and exceed their expectations. MCP's bring the industry standard in training and certification to an organisation, with the potential for increased productivity and support.

## **Benefits:**

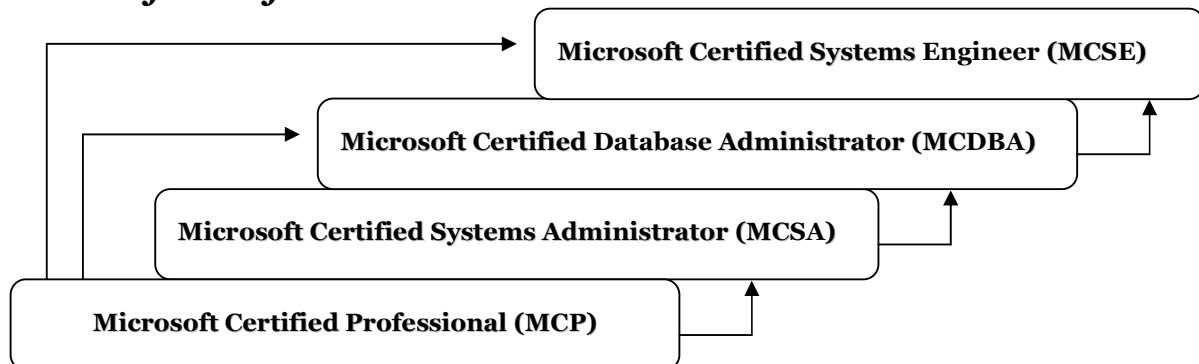

- Access to technical and product information directly from Microsoft through a secured area of the MCP website.
- A free MSDN Online Certified membership exclusively for Microsoft Certified Professionals, sponsored by MSDN Online.
- MCP logo, certificate, wallet card, and lapel pin to identify your Microsoft Certified Professional status.
- Subscription to Microsoft Certified Professional Magazine.

## **Certification Requirements:**

Microsoft Certified Professional (MCP) candidates are required to pass one current Microsoft certification exam in **MCSA**, **MCDBA** or **MCSE** Track that provides a valid and reliable measure of technical proficiency and expertise. MCP is the first qualification in Microsoft Certification.

MCP examinations are developed with the input of professionals in the industry and reflect how Microsoft products are used in organisations throughout the world. The examinations are administered by **Pearson VUE** and **Prometric**, independent testing organisations with locations worldwide.

## **Microsoft Certification Path:**

***Join us today to be the Leaders of Tomorrow!***
